

Eaton Logic Controller (ELC) Product Training Course

“All you need to know about the Eaton Logic Controller”

In collaboration with Intertech, Eaton is offering a two-day course for distributors, field sales and technical support, and customers on the installation, configuration, and programming of the ELC and graphics panels.

The course includes discussion and hands-on lab exercises that enable students to explore programming concepts such as contact, coil, timer, and counter instructions. The customizable course topics are listed below.

Course Content

- Hardware Introduction
- Communications Capabilities
- Operator Interface
- Programming Software
- Detailed Hardware Description for Each ELC
- Discrete, Analog, and Special I/O Modules
- Graphical Interface Panel Operation
- System Addressing
- ELC Data Memory Structure
- User Logic Program Structure
- Program Elements
- System Diagnostics

Intertech can customize the course content to meet the needs of your organization. Students need only to bring a laptop to class.

In addition to offering on-site and at-large classes, Intertech is working with Eaton Service Centers around the country to host ELC training classes. The schedule is provided below.

Classes are limited to eight students, to ensure each person gets the attention they deserve. Enrollment is encouraged at least 14 days in advance of the class. Tuition is \$750 per person, of which 60% may be eligible for reimbursement in the Eaton cooperative marketing development funds program.
